

IDEAL Consortium

A Project of the EdTech Center @ World Education

IDEAL Consortium - Institutional/State Membership

The IDEAL Consortium, a project of the EdTech Center at World Education, Inc., works to support quality blended and distance online learning in adult education and literacy programs across the United States through new educational technology innovations and collaborative research and practice. For 15 years, the IDEAL Consortium, previously Project IDEAL, has provided technical assistance, web-based tools, and publications to member states to help them design distance and blended learning programs based on their distinct needs. We help state and regional leadership train their staff, provide just-in-time technical support, and assess the progress of their efforts.

Membership ensures opportunities for education leaders from different states to meet and learn from each other, gain new insight into what works, and access professional development materials. Technical support is available to members on data collection and analysis, reporting, educational program design, instructional strategies, and selection and use of online curricula. IDEAL Consortium workshop topics and ongoing discussion are shaped in response to the needs and interests of consortium membership.

IDEAL is a dynamic consortium aiming to improve its members' ability to support and accelerate adult learning with technology, both inside and outside of the classroom. We share strategies gleaned from educational research and from our membership for leveraging recent educational technology innovations, ensuring the relevance of professional development offerings available to member states' teachers.

Please complete the form below and email leah.peterson@worlded.org. In addition to the following membership levels, customized professional development packages are also available. We look forward to hearing from you about your membership.

Membership Fees and Benefits

Community of Practice Membership: \$2,000

- Up to five hours of mentoring to support state education and PD leaders
- Two-day, annual summer institute for two people*
- Access to a virtual Community of Practice for DE leaders

Basic PD Membership: \$4,500

- Up to 10 hours of mentoring to support state education and PD leaders
- Two-day, annual summer institute for two people *
- Access to a virtual Community of Practice for DE leaders
- Access to all professional development courses

States or agencies joining at the Basic PD membership level have access to all PD courses, both individual self-paced and facilitated group courses. Most states give teachers access to these courses using the IDEAL Consortium Moodle site. It is also possible for member states to transfer the courses to their own course management software.

Course facilitation is also available from the IDEAL Consortium and can be built into your membership fees or contracted separately.

- IDEAL 101 facilitation for up to 20 participants: \$3,000
- IDEAL 102 facilitation for up to 20 participants: \$1,500
- Special Topics Course facilitation for up to 20 participants: \$1,000

States or agencies can also contract directly with the Ed Tech Center to provide facilitation of any PD course offered by the Ed Tech Center through World Education E-Learning PD.

Please contact us with questions.

Course List

IDEAL Consortium Facilitated Courses

IDEAL 101 - Foundations of Distance Education and Blended Learning

This course helps practitioners develop a site plan for offering distance or blended learning. Over the course of six weeks, all participants work with colleagues within their agency to develop a plan that addresses recruitment, screening, orientation, instruction, and assessment. The course concludes with a supported piloting of the site plan.

IDEAL 102 - Instructional Issues

Teachers with experience teaching online each develop a case study describing an instructional challenge and together the cohort arrives at solutions to pilot. After a month of piloting, each teacher reports on their results.

IDEAL 102 - Program Administration

Program managers with some experience managing distance or blended learning read about effective practice and reflect on current challenges. Each participant writes a case study describing one key issue, and then works with the cohort to find solutions to pilot.

IDEAL 102 - Resource Evaluation

Blended learning and distance teachers with some prior experience will learn how to evaluate online resources for using in distance and blended learning. Through several readings and discussion, the cohort will create a rubric for future resource evaluation and then pilot its use with one new learning resource they hope to integrate into their online instruction.

IDEAL Consortium Special Topics Courses

The following three courses are all self-paced and take approximately three hours to complete. Teachers can self-enroll at any time.

Introduction to Blended Learning

This course presents foundational information about blended learning, including definitions, strategies, examples, and reflective activities presented in multimedia format. The goal of the course is for participants to have a basic understanding of the different forms of blended learning and how they might integrate them into coursework.

Introduction to Open Educational Resources

This course introduces participants to essential information about Open Educational Resources (OERs), including key definitions, examples and reflective activities presented in multimedia format. The goal of the course is for practitioners to understand the benefits of using OERs, know where to find them, and how to evaluate their effectiveness.

Introduction to Mobile Learning

Participants in this course learning about integrating mobile devices into their classroom, distance, or blended instruction. It includes definitions, suggested strategies, examples, and reflective activities. The goal of the course is for teachers to have an understanding of the different ways adult learners and their teachers can use flip-phones, smartphones and tablets to enhance learning both in and out of the classroom.
